

AVIAN

Swing Into Action!

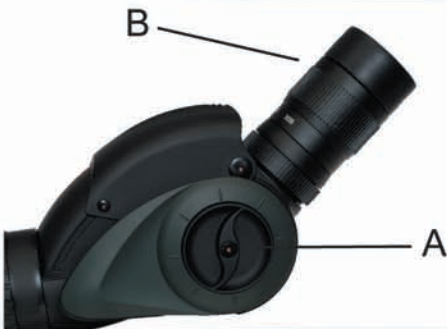

The Avian Multiview 80 is the most exciting spotting scope to be launched in years and for such a low price its an absolute steal.

The variable angled eyepiece has a multitude of advantages here are some of the main points:

- 1) Shared users of different heights do not need to change the tripod height.
- 2) Perfect for hide use and in the field.
- 3) Large 80mm front objective lens for crisp bright images in poor light.
- 4) Powerful high quality zoom.
- 5) Fast barrel focusing system.

“The stability of an angled scope with the ease of use of a straight!”

Mark Coller - Birder & Wildlife Expert

Turn eyepiece fixing wheel (A) anti clockwise to release the eyepiece(B).

Adjust eyepiece to desired viewing angle. Then turn the eyepiece-fixing wheel clockwise to lock the eyepiece.
